Response to Arguments

Applicant's arguments filed 1/14/05 have been fully considered but they are not persuasive.

Applicants argue that the references do not disclose that the treatment modifies the metallic structure of the metal at and below the surface of the metal, since they merely form a coating on the metal surface.

The references disclose the treatment of the metal, which would modify the surface, since the chromating or coloring of the metal does modify the metal (see Abstract of the Japanese patents and the abstract of the Gilroy reference). The treatment would further occur below the surface of the metal, since there will be some migration of the chromium into the metal just below the surface from the surface, which would read upon the modification below the surface.

Applicants cite the specification to show that the modification may involve "phase transformation" or "relaxation of stresses" of the metal surface. This has no basis in the claims, and the specification cannot be read into the claims.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the

advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
